B- Reading Comprehension

3- Read the following passage then answer the questions: (8 Marks)

Whales are the largest animals in the world, even larger than some species of dinosaurs. **Ironically**, whales are among the gentlest creatures we know. There are people who go through great length to help them.

In 1988, when three young whales were trapped in the sea in winter. And the sea had begun to freeze over, volunteers from all over soon turned up to help these creatures. Whales require oxygen from the air, so the frozen ice was a great danger as it prevented them from getting any air. The volunteers cut holes in the ice so as to provide more breathing holes for the whales. This effort was a success although, one whale drowned. Whales are protected from the cold seawater by body fat that is called blubber.

Whales live in the ocean but in terms of behaviour, they are more similar to humans than fish. They live in family groups and they even travel in groups. Whales are known not to desert the ill or injured members; instead, they cradle them. Moreover, female whales have very strong maternal instincts.
